

Email for Carer centres and local authority carer leads

Dear Carers Lead,

In 2009, I published "A Systematic Review of Interventions for Carers in the UK: Outcomes and Explanatory Evidence". You may find this review a useful source of information about existing evidence about the outcomes of services for carers. It is available at - <http://static.carers.org/files/systematic-review-15-jan-3840.pdf>

This was part of the PhD research I am doing into carer services at the University of Nottingham with support from Carers Trust and the Economic and Social Research Council. After a period of maternity leave, I am now completing my PhD and this includes updating my review of research evidence on interventions for carers. I would like to ask for a little help with this.

If you are aware of any local evaluation of carer services, I would very much appreciate it if you could email me with details of the research (including title, author, date and a copy if possible or details of where to access this). This could be research into any kind of support for carers, for example, assessments, information and advice services, carer support workers, breaks, support with employment etc.

I look forward to hearing from you and then sharing the updated findings of my work.

Best wishes
