Health Education England

- A new approach to workforce,
education and training**

April 2013

Introduction

“HEE will provide leadership for the new education and training system. It will ensure that the shape and skills of the future health and public health workforce evolves to sustain high quality outcomes for patients in the face of demographic and technological change.”

“HEE will ensure that the workforce has the right skills, behaviours and training and is available in the right numbers, to support the delivery of excellent healthcare and drive improvement. HEE will support healthcare providers and clinicians to take greater responsibility for planning and commissioning education and training through development of the Local Education and Training Boards (LETBs) which are statutory committees of HEE.”

How we talk about HEE

HEE and our LETBs are the NHS engine that will deliver a better health and healthcare workforce for England. We speak highly of each other.

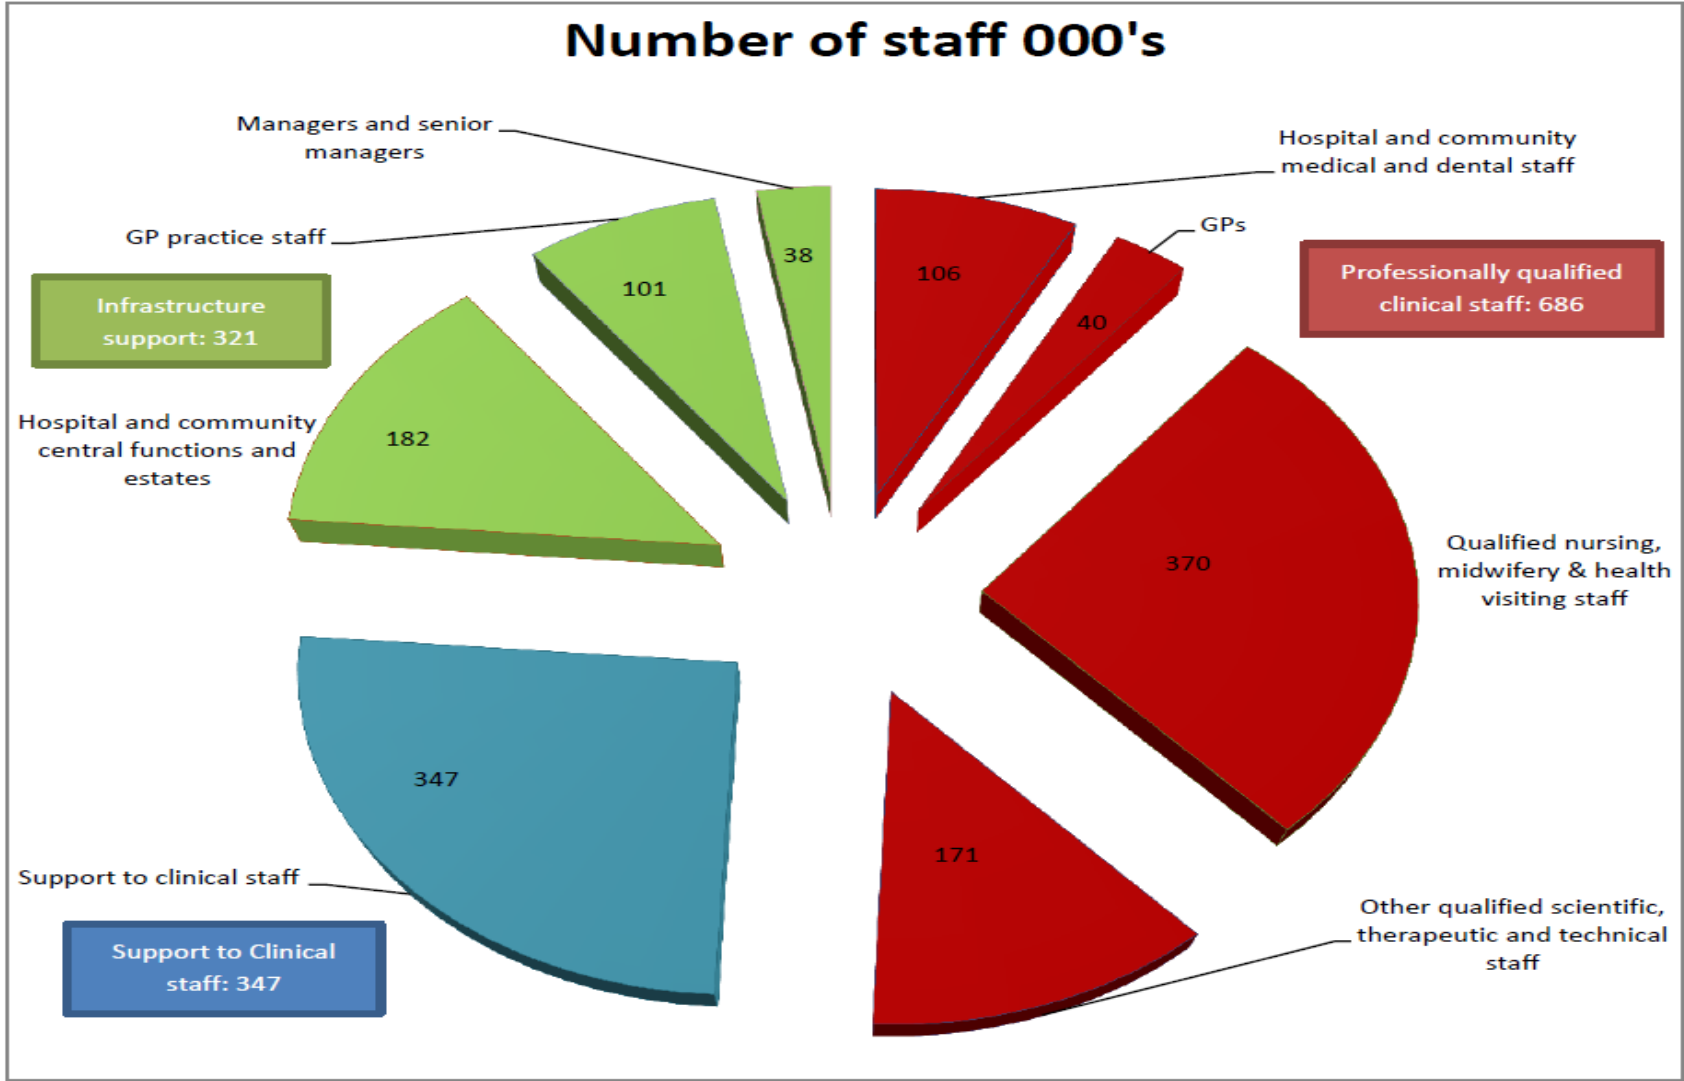

We are responsible for the education; training; and personal development of every member of staff, and recruiting for values from our schools and into our Universities.

We are employer led, to provide the right workforce, with the right skills and values, in the right place at the right time, to better meet the needs and wants of patients.

Our mission is to improve health outcomes for the people of England by developing people for health and healthcare.

Number of staff 000's

Our priorities now

Core values

THE NHS
